COLOR SELECTION

Rope Colors

* Actual colors may vary - data is similar to RAL numbers. Special colors available on request.

Powder Coatings

When selecting color gradients, the corresponding shades are numbered from top to bottom. Powder coatings are offered in corrosivity category C3 as standard. For playground equipment in areas prone to corrosion, such as near the sea, in swimming pools, near industrial plants, cultivated agricultural land, or salt deposits, we recommend the more resistant class C5.

Powder coating available on additional charge. Subject to technical changes.
